# Box for Arduino

The **Box for Arduino** is the perfect enclosure for any Arduino project: the internal mounting plastic pins are designed to fit in all Arduino boards.

The box is particularly well suited for use with the **Arduino Uno/Duemilanove** and the **Arduino Mega**, with the **Ethernet Shield** mounted on top. You'll have to break the two central plastic pins to make room for the **Arduino Mega** fit properly.

The sliding slot of the Ethernet Socket is removable, as is the battery slot.

A 9V battery will fit in the back, making it suitable for wireless projects.

---

**Materials**: The material is **PC-ABS V0**, **UL 94 flame retardant**. It's UV filtered, chlorine and bromine free.

**Measures**: 62mm wide x 112mm deph x 35mm (39mm) height
